Seizure semiology is discussed in depth and correlated with the types and locations of epileptic generators. While semiology cannot, itself, produce precise localization, knowledge of seizure signs and other aspects of clinical presentation provides a powerful context for EEG and imaging data.

Seizure Semiology - Oxford Medicine

EEG is a key instrument aiding the identification of seizures and diagnosis of epilepsy. Additionally, EEG is used in patients with confirmed epilepsy to assist medical treatment by identifying the type of discharge, and assist surgical treatment by localizing and characterizing the seizure focus. Terminology is first presented followed by a discussion of the role of EEG in diagnosis and ...
