### E30 Bmw M40 Engine Will

The M40-series started in 1987 with the production of 1.8-liter four-cylinder engine M40B18. M40 engines came to replace the old M10-series, which was very successful and common for BMW models in those days. A year later, the manufacturer released the smaller version - 1.6-liter M40B16 engine. The engine is quite traditional and straightforward.

## BMW M40B18 Engine specs, problems, reliability, oil, 318i ...

The 8V cylinder head on all M40 engines is a cast aluminium unit, featuring a single direct-action cam to operate the valves. The head is interchangeable between E30 and E36 models, but shares no compatibility with other BMW engines such as the M42, due to that engine's use of a timing chain instead of a helt.

#### M40 - E30 Zone Wiki

Like the M10, the M40 uses an iron block and an aluminium head. Fuel injection

for the E30 versions is Bosch Motronic 1.3, and the E36 versions use Bosch Motronic 1.7. Following the introduction of the BMW M43 engine in 1991, the M40 began to be phased out.

### BMW M40 - Wikipedia

BMW M40 are popular engines and with the right modified parts like remapping, turbo kits and camshafts you will really maximise your driving fun. History of the Engine. The M40 is a SOHC engine and came in 2 sizes, a 1.6 and 1.8. It was offered in a few states of tune over the years with a power drop in 1991. M40B16. 98/101 bhp (105 lbft) 1988 ...

## All you need to know about tuning the M40 engine from BMW

The four-cylinder engines get a lot of stick from E30 owners. "Feeble", "weak" and "two pistons short" are the usual complaints made against the rattly M10 and its M40 sibling. And while it's true that the four-pots can feel a bit asthmatic after driving a big six-cylinder

M20, it doesn't mean all four-pot engines are rubbish; after all, the M3 was powered by the four-cylinder S14 lump.

Engine Swap - M42 - E30 Zone Wiki BMW M40B18 engine reliability, problems and repair. M40B18 also belongs to BMW M40 series and it is an elder brother of M40B16 engine. It was developed in 1987 as replacement of older M10 series that was already out-ofdate at that time.

BMW M40B18 Engine | Turbo, supercharger, tuning, problems
This involves taking your normal e30 and putting an e30 m3 engine in. The engine is a 2.3 liter 4 cylinder engine that produces more power then the 2.5 liter inline 6 that is found in the 325i. Repairs arent cheap, not really a recommended swap unless you know it is what you want.
