Erlang/OTP is divided into a number of OTP applications. An application normally containsErlang modules. Some OTP applications,such as the C interface erl_interface, are written in other languages and have no Erlangmodules. On a Unix system you can view the manual pages from the commandline using.

Erlang/OTP 23.0
By describing the use of Erlang and OTP together, the reader is somewhat insulated from some of the more theoretical sides of functional programming and can instead concentrate on getting the job done. If you are new to Erlang and functional programming then I would not recommend this book on its own.
