contributions of Hans Primas. A professor of chemistry at ETH Zurich from 1962 to 1995, Primas continued his research activities until his death in 2014. Over these 50 years and more, he worked on the foundations of nuclear magnetic resonance spectroscopy, contributed to a number of significant issues in theoretical chemistry.

Melatonin, as you probably already know, is a secretion of the pineal gland that encourages our consciousness to enter the sleeping state.

METAtonin is a member of the same chemical family as melatonin; it is produced by the same gland and it also affects consciousness, but in a more
