Silk: Processing, properties and applications provides an authoritative reference on sericulture, silk fabric processing, silk properties and its applications. The book begins by looking at key aspects of sericulture, including the range of mulberry and non-mulberry species of silk worm, early and late stage rearing and harvesting of cocoons.

The main Song dynasty achievement in silk production was the perfecting of kesi, an extremely fine silk tapestry woven on a small loom with a needle as a shuttle. The technique appears to have been invented by the Sogdians in Central Asia, improved by the Uighurs, and adapted by the Chinese in the 11th century. The term kesi (literally "cut silk") derives from vertical

Silk, lyocell, rayon, cotton, and fine soft wool such as Merino are good choices. There is no set standard for the size of a scarf - some people prefer long and narrow, others prefer a shorter, wider shape. The size of the wearer makes a difference, too. At six feet tall, I am likely to wear a longer, wider shawl than a woman five feet tall.
