Hesston has been known as the hay and forage innovator since 1955, when the company developed the first commercially available self-propelled windrower. Other industry firsts have included the first hydrostatic windrower, the first center-pivot mower-conditioner and the first big square baler—which had nearly 50 individual patents of its own.

### **HESSTON 6450 Windrower Operators Manual, Original. Form ...**

Hesston replaced the model with the 6450 windrower, placing the engine farther away from the operator. The company also outfitted the operator's platform with rubber cushion mounts to reduce engine noise. A windrower cuts hay or other grasses in large sections, setting them up into rows, or "windrows," for collection.
