### Honda Civic Manual Transmission Whine

There are two main bearings in the transmission that can go bad, which (as with the gears) would also result in a whining noise. These are the throwout bearing and the input shaft bearing. If you have a bad throwout bearing, the whining noise should go away when you step on the clutch (when the engine is in neutral or idling).

### Honda Civic: Why is My Car Whining When I Press the Gas ...

The reason I'm asking is because I had transmission fluid changed with non-Honda fluid around 7k miles ago and I haven't been noticing/haven't been paying attention to the sound prior. I'm trying to correlate the relation between the noise and the fluid change.

### Honda Civic manual transmission whine | EricTheCarGuy

I have not experienced any transmission problems with this year Civic. Usually the noise that you describe is more tire related. A mechanical whine usually doesn't go away after ten minutes. These Civics do have issues with tire wear and depending upon what type of tire is on the vehicle they can make a variety of noises.

### transmission whining - 2006 Honda Civic - RepairPal.com

The service light on the dashboard could indicate that the transmission is working too hard and is overheating. This may be due to a more serious problem with the transmission. If the other symptoms of transmission problems are present and the service light comes on, get the Civic checked out immediately.

The transmission may have suffered excessive wear from the lack of fluid, that wold explain the whining noise – worn out gear teeth. If you hear the squeaking noise when depressing the pedal and the engine is running, this could be a worn pilot bearing, or problems with the throw-out fork off pivot.

### Diagnosing Symptoms of a Bad Manual Transmission | AxleAddict

Craig Douglas, president of highly rated Automotive Service Group in Indianapolis, says just like an automatic transmission, manual transmission fluid needs to be replaced to keep the internal components operating correctly. He adds that manufacturers have direct specifications, but recommends a fluid change around 45,000 to 60,000 miles.

### What are the Most Common Problems with Manual Transmission ...

Automatic transmission noises are often very different than engine noises. They're usually constant, either a whine or growl during transmission operation. Sometimes you get the occasional tick or thump as well. It's hard to describe, but transmission noises sound very different than engine noises to me.

### Automatic Transmission Noises | EricTheCarGuy

You're going to have to determine if the whine is transmission or engine related. If it's transmission related, you can try doing a trans. Flush to see if some fresh oil cures the whine. First I'd check the level of the oil though.

Transmission failure problem and complaint against 2001 Honda Civic may 6, 2010. Sudden failure to accelerate while in traffic will kill someone, as it almost happened to me today and I want the NHTSA to get serious about a safety recall! there are hundreds, if not thousands, of transmission failure complaints against the 2001 Honda Civic and this problem deserves investigation which will ...

### Transmission Noise Problems of the 2001 Honda Civic

"They are straight cut, and are not in constant mesh with its opposing gear. Typically, the reverse idler gear is moved to a point where it engages the straight cut gear teeth on both this synchronizer assembly and the similar teeth on the countergear assembly. These straight cut teeth is why transmissions usually "whine" in reverse.

The average price of a 1993 Honda Civic transmission fluid change can vary depending on location. Get a free detailed estimate for a transmission fluid change in your area from KBB.com

### 1993 Honda Civic Transmission Fluid Change Prices & Cost ...

Recently I've noticed a low whine or a whistle-like noise coming from the transmission area of the car when crawling at low speeds in 1st gear. I'm not sure if the two are related, but about 1000 miles in I noticed that in warm weather when coming to a stop the car will feel as if I'm going to stall despite the clutch being fully depressed.
