Seizure disorders - AMBOSS
Seizure types most commonly follow the classification proposed by the International League Against Epilepsy (ILAE) in 1981. These classifications have been updated in 2017. Distinguishing between seizure types is important since different types of seizure may have different causes, outcomes and treatments.

Seizure types - Wikipedia
Despite the ID Psychiatrists expressing an interest in epilepsy – minimum standards for the treatment of people with epilepsy are not met. 141 responses to an e-questionnaire (from a pool of 332) were received. Under two thirds had heard of SANAD, the NASH audit, or the new ILAE classification. 41% felt confident managing people with epilepsy.

Home Page: Seizure - European Journal of Epilepsy
Epilepsy is a group of neurological disorders characterized by recurrent epileptic seizures. Epileptic seizures are episodes that can vary from brief and nearly undetectable periods to long periods of vigorous shaking. These episodes can result in physical injuries, including occasionally broken bones. In epilepsy, seizures have a tendency to recur and, as a rule, have no immediate underlying ...
