face pain. It is edited and written by world-class leaders in headache medicine and features practical presentations of the entire spectrum of procedures, from simple to complex.

## **Interventional management of head and face pain : nerve ...**

By Lauren R. Natbony, MD, Assistant Professor of Neurology, Center for Headache and Facial Pain, The Mount Sinai Hospital, New York. Interventional headache management aims to stop or substantially reduce head and facial pain. Whereas acute or “rescue” treatment is meant to relieve a single headache attack, and preventative therapies target an overall reduction in headache frequency, interventional management can be both: acute and/or preventive.
