### Laws Of Nature Interpretations

Laws of nature are of two basic forms: (1) a law is universal if it states that some conditions, so far as are known, invariably are found together with certain other conditions; and (2) a law is probabilistic if it affirms that, on the average, a stated fraction of cases displaying a given condition will display a certain other condition as well. In either case, a law may be valid even though it obtains only under special circumstances or as a convenient approximation.

Scope and Nature of Interpretation. The necessity of interpretation would arise only where the language of a statutory provision is ambiguous, not clear or where two views are possible or where the provision gives a different meaning defeating the object of the statute. If the language is clear and unambiguous, no need for interpretation would arise.
