Technical analysts, on the other hand, believe these fundamentals are already reflected by price, and that future prices can only be determined by looking at charts and analyzing “statistical trends gathered from trading activity.” In other words, technical analysts are predominantly looking at data and doing a form of pattern recognition.

Technical analysis, the art of wrongly predicting the future

Technical Analysis is the forecasting of future financial price movements based on an examination of past price movements. Like weather forecasting, technical analysis does not result in absolute predictions about the future. Instead, technical analysis can help investors anticipate what is “likely” to happen to prices over time.
