The 52-Week Low Formula: A Proven Approach that Beats the ...

Many investors use 52-week highs and
52-week lows as a factor in determining
a stock's current value and as a
predictor of future price movements. As
a stock trades within its 52-week price
range (the range that exists between the
52-week low and the 52-week high),
investors may show increased interest
as price nears either the high or the low.

All US Exchanges 52-Week New Lows
The New Highs/Lows page provides access to lists of stocks that have made or matched a new high or low price for a specific time period. Stocks must have traded for the specified time period in order to be considered as a new High or Low.

All US Exchanges 52-Week New Lows - Barchart.com

In other words, we simply identify the size of the 52-week range by subtracting the 52-week low from the 52-high. Then we divide this value by 52 in order to find the average weekly move of the price. Let's say the 52-week high of a stock is located at \$452.00 per share and the 52-week low is \$374.00 per share.
