This Equals That

This Equals That...takes viewers on a whimsical journey, while introducing them to the fundamentals of visual literacy and teaching them associative thinking -Aperture learning guide About the Author

This Equals That: Fulford, Jason, Shopsin, Tamara, Fulford ...

"This Equals That is printed like a children's board book, with rounded edges and durable pages to make it a durable, child-friendly object. But its lessons aren't limited to the young: how simple and powerful it is to recognize that a triangle and a shark are the same shape, that everything we can see is somehow connected to each other?"

Excel formula: If this AND that OR that | Exceljet

If you want to do something specific when a cell equals a certain value, you can use the IF function to test the value, then do something if the result is TRUE, and (optionally) do something else if the result of the test is FALSE. If color is red, mark with "x" In the example shown, we simply want to "mark" or "flag" records where the color is ...

Returns Boolean. true if the specified object is equal to the current object; otherwise, false.. Examples. The following example shows a Point class that overrides the Equals method to provide value equality, and a Point3D class that is derived from Point. Because Point overrides Object.Equals(Object) to test for value equality, the Object.Equals(Object) method is not called.

Object.Equals Method (System) | Microsoft Docs

An equation says that two things are equal. It will have an equals sign "=" like this: $7 + 2 = 10 - 1$ That equation says: what is on the left ($7 + 2$) is equal to what is on the right ($10 - 1$) So an equation is like a statement "this equals that" Here is another equation:

Read Book This Equals That

The definition of equals in Java requires symmetry, i.e. `a.equals(b)` must be the same as `b.equals(a)`. In fact, the very documentation of Set says Returns true if the specified object is also a set, the two sets have the same size, and every member of the specified set is contained in this set (or equivalently, every member of this set is ...
